Professional Experience

Manager - Enterprise Automation Capability Lead

Eli Lilly, Indianapolis, IN | March 2025 - Present

- Manage Developers and contractors building internal automation products
- Collaborate with internal stakeholders to facilitate sessions, gather, and document detailed technical requirements. This process led to well-defined project plans, ensuring timely project delivery.

Tech Lead

DMI, Indianapolis, IN | October 2023 - March 2025

- Managed a team of 4 developers building and maintaining 2 complex software applications (UI and APIs) in the pharmaceutical manufacturing space
- Implemented best practices for code review, CI/CD pipelines via Github Actions and automated testing to improve overall team productivity and code quality
- Facilitated collaborative sessions with stakeholders to gather and document detailed technical requirements, resulting in well-defined project plans that ensured timely project delivery
- Maintain/Investigate AWS infrastructure consisting of CloudFront, Lambdas and Step Functions
- Build/Refactor existing code base based on client requirements

Tech Stack: React, Node, Python, Postgres, GraphQL, AWS

Sr Software Engineer

DMI, Indianapolis, IN | January 2020 - October 2023

- Developed data-driven dashboards using Vue, integrating with third-party SaaS platforms (Heroku, Salesforce, Github, Slack, Contentful) for application owners. This resulted in a 25% decrease in unused licenses
- Successfully migrated 15 internal projects from Heroku to AWS, leading to significant cost savings
- Maintained internal npm package for secure Active Directory authentication, streamlining development processes
- Mentored junior engineers in best practices for coding, testing, and code review processes, resulting in improved overall team performance and project timelines
- Design, deploy, debug internal tools utilizing an array of technologies and languages

Tech Stack: React, Vue, Node, Python, AWS

Director of Engineering

DocuMentor, Indianapolis, IN | August 2019 - August 2020

- Led the definition of product architecture and made critical design decisions for DocuMentor, a new Medicaid documentation startup
- Managed a team of 6 contractors, ensuring efficient development and delivery of the product within a tight timeframe and budget.
- Spearheaded the development of a scalable and secure product architecture
- Three clients signed immediately after launch with 25 users and over 300 client provided patients managed at the time of launch

Tech Stack: React, Node, Mongo, Passport

Software Engineer

Olio, Indianapolis, IN | June 2018 - August 2019

- Post Acute healthcare communications platform taken from MVP to market
- Proposed and implemented a feature to notify care team of urgent patient issues with email and push notifications.
- Identified and Upgraded React version from v15 to v16 to utilize newly introduced hooks
- Built and Maintained API endpoints in Ruby on Rails backend
- Implemented the use of Formik to take advantage of built in validation and form submission

Tech Stack: Ruby On Rails, React, React Native, Postgres, Expo, AWS

Software Engineer

MOBI, Indianapolis, IN | August 2014 - June 2018

- Optimized and maintained Ruby on Rails API code for processing submitted CSVs to ensure accuracy and error handling
- Troubleshooted and resolved critical bugs impacting the functionality of 3rd party telecom API integrations, ensuring accurate billing information retrieval
- Transitioned to Full Stack team tasked with modernizing UI and reporting capabilities from .erb/jQuery to AngularJS

Tech Stack: Ruby on Rails, AngularJS, Postgres

Key Skills

Javascript/Typescript, Node, React, React Mobile, Vue, Postgres, Mongo, Ruby on Rails, Python, AWS, Leadership, Excellent Verbal and Written Communication
